

# Pick Now!™

A seasonal freshness calendar to inspire all of your Pick, Mix & Serve adventures!

JULY

These wide, dark green peppers are sometimes referred to as pasillas, and in their dried form are referred to as chile ancho. In all forms, the membranes and the seeds are where you'll find the heat.

peaches

persian  
cucumbers

The popularity of these small cucumbers is on the rise. Considered the pinnacle of "burpless" cucumbers with smooth, thin skin and a crisp, crunchy sweetness.

A pleasure for the senses—with velvety, deep burgundy petals and a dark brown center, chocolate cosmos carry a sweet vanilla scent with a tinge of chocolate and they're a breeze to grow.

With a heated on-going rivalry between Georgia and South Carolina over who produces the best peaches, both states can thank those hot Southern nights, which make for juicy, sweet fruit.
